# Ui Path Process Mining

Seamlessly connect to applications like SAP, Salesforce, and Oracle, and create Process Mining Apps tailored to your process transformation objectives

### 뫎

Gain full process transparency, identify bottlenecks and deviations, and make informed decisions with AI-driven cost and time analysis

Simplify processes, automate where it makes sense, and create new workflows for meaningful transformation outcomes

Leverage continuous monitoring capabilities to make smarter automation decisions and ensure your strategy keeps delivering value

# Ui Path Task Mining

Centrally manage data captured at scale

Visualize task variations and detailed metrics around them

Export to Process Definition Document (PDD), Studio (XAML), or Automation Hub

Pre-configured PII data masking

Role-based access control (RBAC)

### Ui Path Communications Mining

No-code, guided user experience

Real-time monitoring & alerts

AI Guardrails including human-in-theloop

Generative AI to automate more, and accelerate model training

# Ui Path" Automation Hub

Automation opportunity pipeline management in one place

High-level and detailed opportunity assessment

Automation Profile page for every automation idea

ROI calculator

**Documentation repository** 

Pre-built dashboards

Your starting point in your automation journey

Develop cross-platform automations & learn the fundamentals through API triggered scenarios & Web based UI Automation

Additionally, automate desktop focused scenarios using native desktop UI Automation & advanced desktop Office support

Go back and forth between web & desktop for cross-platform projects

Multiple file support, integrate additional sequences, flowcharts, state machines or even your preferred language low-level code. Use advanced debugging & troubleshooting tools, advanced UI Automation. Include dev ops best practices through Test Automation & RPA Testing capabilities

Go back and forth between web & desktop for cross-platform projects

# Ui Path" Studio Web

No IT dependencies, no installation

No programming experience needed

Cross-platform automations

API triggered scenarios & Web based UI Automation

# Ui Path Integration Service

Create superior API automations to across any app or system

Large catalog of pre-built connectors, including a collection of generative AI/ML integrations

Build your own connector with Connector Builder

Curated activities for a uniform and simplified integration experience for users, developers and partners

Robots react and respond automatically with event-driven triggers to any business process event

**Document Understanding** 

**Al Center**

**Document Understanding** 

Al Center

# Ui Path Apps

Your awesome automations deserve a beautiful front door

Create automation-powered apps just by scanning a PDF (with Autopilot for Apps -Insider Preview)

Cut down on customer calls by offering public-facing apps for self-service

Govern your app rollout and access with ease

Leverage app templates to build in half the time

The GPS for your company's automation journey

Automate

Evangelize your automation program from one spot

Grow an internal automation community

Customize Launchpad to fit your company's specific automation curricula

Gamify your automation rollout with leaderboards

# Ui Path® Robots

Accomplish more—with more intelligent software robots

#### **Automation Cloud™ Robots**

- Build and run robots in UiPath Automation Cloud™--with zero infrastructure
- Serverless or VM-based

#### **Attended Robots**

Enable every employee with a personal digital assistant to help with daily tasks

#### **Unattended Robots**

- Automate task-heavy, long-running workflows
- Self-host, on-premises, or in public cloud

1/3

# Ui Path Assistant

A personal digital assistant for every employee

Engaging desktop interface to access, manage, and run attended automations

Available on Windows and MacOS

Access to Apps, Action Center, Automation Hub, and Marketplace directly from Assistant

Ability to work side-by-side with a robot in Picture-in-Picture mode

Centralized governance

#### Coming soon: Autopilot for Assistant, the Al companion

- Contextual guidance—across business apps and systems
- Interactive chat, powered by Generative AI
- Access to UI and API automations
- Access to UiPath specialized Al models
- One-click export to Studio Web

### **Automation Cloud** Robots

The fastest, easiest way to build and run unattended robots

Instant, limitless robot power with zero infrastructure

Windows VM-based robots run from standard or customized images

Serverless Automation Cloud Robots run cross-platform API and web-based automations

Supports third-party software installation, automated domain join, and site-to-site VPN connection back to your own network

SOC2® Type 2 & HIPAA Type 2 attestation

# Ui Path Action Center

Collaborate and automate more, more efficiently

**Human-in-the-loop** for seamless automation of advanced processes

**Long-running workflows** that span over days, weeks, and multiple business units—all efficiently automated

**Automation on-the go** so you can act whether you're at your desk or on the move, with access through the web or mobile app

**Platform integrations** for Document Understanding, Process Mining and Al Center

# Ui Path Data Service

Model, manage, and store business data with just a few clicks, and no code

Multiple data types creation like text, numeric, relational, files and more

Integrate with any enterprise or legacy system, database or other custom apps to aggregate and store data

Simple one click import of data and rich entity objects into Studio and Apps

Role-based access control to secure your automation data

# Ui Path Document Understanding

Intelligently process documents using Al

Pre-built Specialized AI models for the most common document types across industries and domains

Enhanced with Generative AI for unstructured documents and to accelerate time to value

End-to-end document processing at scale integrated into the leading Al-powered automation platform

The next-gen guided user experience with active learning—no coding or ML skills needed\*

# Ui Path Al Center

# **Enhance your automations with Al**

**Studio integration:** easily integrate ML models into your processes with a drag-and-drop experiance

**Model flexibility:** Use our pre-built models or import your own to create business-specific Alpowered automations

**Optimized workflows:** gain a refined view of your data, user activity, and model performance to enhance your workflows

**ML** command center: manage the entire cycle of ML models - from deployment to improvement - with a single, streamlined interface

**Dashboard library:** build your own or use a pre-designed template, customized with the KPIs specific to your business

**Situation awareness:** get real-time updates on crucial occurrences and milestones

**Performance tracking:** measure and analyze to spot trends and improvement areas

**Consistent reporting:** share customizable reports with your stakeholders

**Platform integrations:** connect reporting to Automation Hub and Document Understanding

# Ui Path Test Manager

**SAP Heatmap** 

**SAP Change Impact Analysis** 

Low-code and coded automations

**50+ ALM tool integrations** 

Autopilot<sup>™</sup> for Testers (in Preview – GA 2024.4)

- Generate step-by-step tests from requirements
- Generate code from test steps
- Insights from test results

# Ui Path Orchestrator

Long-running workflows keep unattended robots working on their next job while waiting for human input

Predictive SLAs keep your robots meeting your business deadlines

Role-based access control (RBAC) enforces separation of lifecycle capabilities

Monitoring and logs help with debugging, audit, or analysis in third-party tools

Live streaming, remote control and video recording for unattended robots for easy debugging and visibility into task execution

### Ui Path Automation Ops

Out-of-the-box deployment

Applies to existing install base\*

Deployed as part of UiPath Automation Cloud<sup>TM</sup>

Tightly connected to Studio and Assistant

Oversight and control without intrusion and undue restrictions

Deployed at organization level, tailored to individual needs

321. 34. 55

### Ui Path Automation Cloud®

The full Business Automation Platform, including SaaS robots

Plugs into your existing environment with identity provider and other key system integrations

Governance for enterprisescale development and operations

IT automation options

Tenant-level multi-region support

Delayed update and other advanced capabilities

ATTESTATIONS FOR CORE PLATFORM SOC 2 TYPE 2, ISO/IEC 27001 AND ISO 9001

# Ui Path Automation Suite

Full platform - Single install in cloud, onprem Linux VMs, or on bare metal server

Portal access to all services and integrations

Host multiple organizations on one infrastructure

Supported by UiPath end-to-end

Kubernetes infrastructure and tools embedded, or deploy on your current AKS/EKS cluster

# **Ui Path** Community
